The International Science Council and UNESCO have co-organized a conference aiming to raise awareness about the importance of scientific freedom and responsibility, and promote efforts to strengthen its implementation.

Scientific freedom and responsibility are key requirements for promoting the quality of scientific endeavour and consolidating trust in science and thereby for achieving the 2030 Agenda. Yet, much remains to be done to elucidate their content and develop comprehensive implementation.

You must register separately to attend this event (and bring your official photo ID to enter UNESCO). Registration is open to all.
